

HARSH RAJ SINGH

Data & Analytics | Analytics Engineering | AI-Driven Self-Serve Analytics
Toronto, ON, Canada | 604.729.7795 | hrs7795@gmail.com | [linkedin.com/in/hrs7795](https://www.linkedin.com/in/hrs7795)

PROFESSIONAL SUMMARY

Results-driven Data & Analytics professional with 6+ years of experience transforming complex, large-scale data into self-serve, decision-ready insights across Pharma R&D, Pre-clinical Healthcare Research, Retail, and E-Commerce. Pairs deep expertise in dbt data modeling, BigQuery, and modern BI with hands-on delivery of agentic AI workflows, connecting Claude and Cursor to enterprise data via MCP so stakeholders generate governed insights in plain language. A trusted advisor to senior leadership (CCO, SVP, VPs, Senior PMs), driving full-stack analytics end-to-end, from strategy and pipeline architecture to reporting that reaches users in days, not weeks, and consistently turning data into measurable business impact.

CORE SKILLS & TOOLS

Languages & Querying: Advanced SQL (Complex Joins, CTEs, Window Functions, Query Optimization, Performance Tuning), Python (Pandas, NumPy, scikit-learn, NLTK, Matplotlib, Seaborn)

Data Modeling & Engineering: dbt (Modular Modeling, Jinja Macros, Incremental Models, Post-Hooks, Custom Tests, Row-Level Security, Documentation & Lineage), LookML, Data Warehousing, Partitioning & Clustering

AI & Agentic Workflows: Claude, Claude Cowork, Cursor, Claude & Cursor Skills Development, Agentic Workflow Design, Model Context Protocol (MCP) Integrations, Vertex AI, Gemini, GitHub Copilot

Cloud & Warehousing: Google Cloud Platform (GCP), BigQuery, Google Cloud Storage (GCS), MySQL

BI & Visualization: Looker, LookML, Looker Studio, Matplotlib, Seaborn, Tableau

Analytics & Methods: A/B & Hypothesis Testing, Funnel Analysis, Cohort & Customer Segmentation, Revenue & Margin Modeling, Engagement Analytics, Customer Lifetime Value (CLTV)

Product, CRM & Web Analytics: Heap, Segment, Salesforce, Salesforce AI

Collaboration & Docs: Jira, Aha!, Scrum/Agile, Miro, Confluence, Guru, Git/GitHub

PROFESSIONAL EXPERIENCE

Senior Data Analyst, BenchSci

Mar 2023 – Present

Toronto, ON, Canada

- Lead full-stack analytics end-to-end, from stakeholder brainstorming through data-source integration, pipeline development, and reporting strategy, putting critical insights in users' hands in days rather than weeks, while mitigating bottlenecks across the analytics lifecycle.
- Built **agentic just-in-time analytics workflows** by connecting Claude to BigQuery via MCP and packaging reusable skills that let GTM, Sales, and Product stakeholders self-serve insights from natural-language questions, with built-in audit trails and compliance guardrails, **reducing analytics inbound requests by 75%**.
- Engineered an automated executive reporting workflow in Cursor using BigQuery and Slack MCPs that **refreshes a live SLT dashboard every morning**, generates a templated highlights message, and delivers a hosted dashboard link, eliminating manual reporting cycles for senior leadership.
- Designed and maintained scalable dbt pipelines and models on BigQuery, integrating Heap and Segment web-engagement data with Salesforce CRM data using advanced SQL, Jinja macros, partitioning, clustering, custom data tests, and DRY-compliant modular architecture.
- Implemented row-level security (RLS) policies and GCS data-exchange exports via dbt post-hooks, partnering with Infrastructure to securely share usage analytics with enterprise clients for self-visibility.
- Delivered engagement and revenue analytics for senior leadership, engagement and high-value adoption rates, dwell time, session length, activation, plus token-based subscription economics (cost-to-serve, revenue per token, gross/net margin, ARR, cohort analysis, CLTV).
- Built Looker/LookML solutions (views, explores, derived tables, models) and interactive dashboards for GTM, Product, and Infrastructure teams to track value metrics and KPIs for strategic planning and resource optimization.
- Developed a cost-effective GenAI framework on Vertex AI to classify conversational-AI user queries into biological workflows and research themes, informing the ontology knowledge base and reducing operational costs by 95%.
- Led CRM migration from Salesforce to Salesforce AI; reviewed peer pull requests, enforced coding best practices, and mentored junior analysts and interns on the codebase, tooling, and analytics standards.

Data Analyst, Goodfood Market

Jul 2021 – Feb 2023

Toronto, ON, Canada

- Built Looker dashboards and reports delivering KPIs and business insights to Marketing, Logistics, Operations, and Finance, enabling data-driven decision-making at the enterprise level.
- Implemented customer segmentation and cohort analysis in Looker to study post-acquisition behavior and optimize marketing strategy.
- Developed LookML backend (explores, views, SQL-derived tables, PDTs) and ingested third-party data (Locus, Shopper Kit, Algolia) into BigQuery to expand reporting capabilities.
- Executed complex SQL for ad-hoc finance and marketing analyses and integrated Google Colab with BigQuery for EDA using Pandas, NumPy, Matplotlib, and Seaborn.
- Conducted sentiment analysis on customer feedback using NLP and ML libraries (scikit-learn, NLTK).

Data Analytics Consulting Intern, KPMG

Jun 2020 – Jul 2020

Canada (Remote)

- Assessed customer datasets for quality issues, cleaned and restructured the data, and recommended approaches to identify high-value customers.
- Executed RFM (Recency-Frequency-Monetary) customer segmentation in Python (NumPy, Pandas) and built Tableau dashboards summarizing insights.

EDUCATION

Master of Engineering, Electrical & Computer Engineering

Sep 2019 – Dec 2020

University of British Columbia, Vancouver, Canada | GPA: 3.93/4.00

Bachelor of Technology (Honors), Electrical Engineering

Aug 2014 – May 2018

National Institute of Technology, Raipur, India | CPI: 9.55/10.00
